Contents of Volume 37

NUMBER 1, MARCH 1974

ROBERT O. KELLEY AND JOHN G. BLUEMINK. An Ultrastructural Analysis of Cell and Matrix Differentiation During Early Limb Development in *Xenopus laevis*..... 1

SHIGEKI MIZUNO, YANG RIM LEE, A. H. WHITELEY, AND H. R. WHITELEY. Cellular Distribution of RNA Populations in 16-Cell Stage Embryos of the Sand Dollar. *Dendraster excentricus*..... 18

LLOYD H. MATSUMOTO AND SANJOY DASGUPTA. Cytoplasmic Alteration of an Established Pattern of *Rana pipiens* Chromosomal DNA Replication..... 28

LOUIS E. BURTON AND WILLIAM W. WELLS. Studies on the Developmental Pattern of the Enzymes Converting Glucose 6–Phosphate to *myo*–Inositol in the Rat..... 35

M. OKADA, I. A. KLEINMAN, AND H. A. SCHNEIDERMAN. Restoration of Fertility in Sterilized *Drosophila* Eggs by Transplantation of Polar Cytoplasm..... 43

M. OKADA, I. A. KLEINMAN, AND H. A. SCHNEIDERMAN. Repair of a Genetically-Caused Defect in Oogenesis in *Drosophila melanogaster* by Transplantation of Cytoplasm from Wild-Type Eggs and by Injection of Pyrimidine Nucleosides..... 55

DAVID C. TURNER, VERNI MAIER, AND HANS M. EPPENBERGER. Creatine Kinase and Aldolase Isoenzyme Transitions in Cultures of Chick Skeletal Muscle Cells..... 63

GORDON MCBRIDE, JEAN LABOUNTY, JULIAN ADAMS, AND MICHAEL BERNS. The Totipotency and Relationship of Seta-Bearing Cells to Thallus Development in the Green Alga *Coleochaeta Scutata*. A Laser Microbeam Study..... 90

GERALD D. FISCHBACH AND MARC A. DICHTER. Electrophysiological and Morphologic Properties of Neurons in Dissociated Chick Spinal Cord Cell Cultures..... 100

MICHAEL C. O'NEIL AND FRANK E. STOCKDALE. 5-Bromodeoxyuridine Inhibition of Differentiation. Kinetics of Inhibition and Reversal in Myoblasts..... 117

C. M. DOYLE, R. ZAK, AND D. A. FISCHMAN. The Correlation of DNA Synthesis and DNA Polymerase Activity in the Developing Chick Heart..... 133

JEAN-MARIE MATTHIEU, ROSCOE O. BRADY, AND RICHARD H. QUARLES. Developmental Change in a Myelin-Associated Glycoprotein: a Comparative Study in Rodents..... 146

SANDRA J. SMITH-GILL. Morphogenesis of the Dorsal Pigmentary Pattern in Wild-Type and Mutant *Ran pipiens*..... 153

GEORGE E. SHAMBAUGH III, SUZANNE C. MROZAK, BOYD E. METZGER, AND NORBERT FREINKEL. Glutamine-Dependent Carbamyl Phosphate Synthetase during Fetal and Neonatal Life in the Rat..... 171

PATRICIA A. BUCKLEY AND IRWIN R. KONIGSBERG. The Avoidance of Stimulatory Artifacts in Cell Cycle Determinations *in vitro*..... 186

PATRICIA A. BUCKLEY AND IRWIN R. KONIGSBERG. Myogenic Fusion and the Duration of the Post-mitotic Gap (G_1)..... 193

Brief Notes

R. L. TATE. Changes in the Activity of Selected Enzymes during Starvation of *Physarum polycephalum*..... 213

ELLEN B. KAHN AND SIDNEY B. SIMPSON, JR. Satellite Cells in Mature Uninjured Skeletal Muscle of the Lizard Tail..... 219

Features

News, Opinion and Letters ..... f-
Current Literature ..... f-
Editor's Index ..... f-

NUMBER 2, APRIL 1974

A. J. DURSTON. Pacemaker Activity during Aggregation in *Dictyostelium discoideum* .. 22
ANDREAS KISTLER AND RUDOLF WEBER. Enzyme Patterns in Mitochondria of Eggs, Liver, and Skeletal Muscle during Larvel Development of *Xenopus* 23
BRUCE M. CARLSON, STEVEN E. CIVILETTO, AND HARRY G. GOSHGARIAN. Nerve Interactions and Regenerative Processes Occurring in Newt Limbs Fused End-to-End 24
KERRY B. CLEGG AND PAUL C. DENNY. Synthesis of Rabbit Globin in a Cell-Free Protein Synthesis System Utilizing Sea Urchin Egg and Zygote Ribosomes 26
EVA BRYHNI. Genetic Control of Morphogenesis in the Multicellular Alga *Ulva mutabilis* 27
GARY W. CONRAD AND DANIEL C. WILLIAMS. Polar Lobe Formation and Cytokinesis in Fertilized Eggs of *Ilyanassa obsoleta*. II. Large Bleb Formation Caused by High Concentrations of Exogenous Calcium Ions 28
F. CHYTIL, S. R. GLASSER, AND T. C. SPELSBERG. Alterations in Liver Chromatin during Perinatal Development of the Rat 29
BEVERLY ANDERSON, NORMA B. KIM, ROBERT P. RHEA, AND MURRAY D. ROSENBERG. Nucleoside Triphosphate Hydrolase Activities of Avian Vitelline Membrane and Oviductal Lumen 30
PHILIP H. BONNER AND STEPHEN D. HAUSCHKA. Clonal Analysis of Vertebrate Myogenesis. I. Early Developmental Events in the Chick Limb 31
STEPHEN D. HAUSCHKA. Clonal Analysis of Vertebrate Myogenesis. II. Environmental Influences upon Human Muscle Differentiation 32
STEPHEN D. HAUSCHKA. Clonal Analysis of Vertebrate Myogenesis. III. Developmental Changes in the Muscle-Colony-Forming Cells of the Human Fetal Limb 34
LEROY C. STEVENS AND DON S. VARNUM. The Development of Teratomas from Parthenogenetically Activated Ovarian Mouse Eggs 36
JAMES W. HINDS AND PATRICIA L. HINDS. Early Ganglion Cell Differentiation in the Mouse Retina: An Electron Microscopic Analysis Utilizing Serial Sections 38

Brief Notes

M. V. PLESKOVA, V. M. RODIONOV, R. S. BUGRILOVA, AND B. V. KONYUKHOV. The Partial Purification of Growth-Inhibition Factor of the Brachypodism-H Mouse Embryos 417
FRED H. WILT AND DANIEL MAZIA. The Stimulation of Cytoplasmic Polyadenylation in Sea Urchin Eggs by Ammonia 422

Author Index

Subject Index for Volume 37 will appear in the December 1974 issue as part of a cumulative index for the year 1974.

Current Literature f-12
Editor's Index f-18

Information for Authors

Developmental Biology will publish in English original papers bearing on problems of development in the broadest sense; it will contain papers dealing with embryonic and postembryonic development, growth, regeneration, and tissue repair, both of plants and animals. The journal will serve as meeting ground for studies on development employing techniques of a wide range of disciplines, e.g., biochemistry, biophysics, cytology, experimental morphogenesis, teratology, genetics, immunology, microbiology, pathology, pharmacology and physiology.

Articles should not exceed 15,000 words and should be accompanied by an abstract that gives, in 200 words or less, a synopsis of the work including methods and results. *Brief Notes* must not exceed 2000 words. The usual format is: abstract, introduction, methods and materials, results, and discussion, but authors are encouraged to present their material in the most logical and appropriate form. Indicate the address for galley proof. In order to save time, page proofs will not be sent to authors. Our aim is to keep the publication time less than 6 months. Two copies of the manuscript (the original and one carbon) and two copies of the figures should be mailed to Dr. Elizabeth Hay, Department of Anatomy, Harvard Medical School, Boston, Massachusetts 02115.

Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. They must be typewritten, double-spaced, on one side of white bond paper about 8-½ x 11 inches in size, with the pages numbered consecutively. Include with full length articles a running page headline not exceeding 35 letters and spaces. Use footnotes sparingly, if at all. Cite them, using superscript numbers, in consecutive order in the text. Type them consecutively on a separate sheet. Acknowledgments and figure legends should also be typed, double-spaced, as separate sections.

Tables should be used to condense data referred to in the text. They should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text, and collected at the end of the manuscript. Give each table a concise, descriptive heading. Tables should be so composed that the material they contain can be grasped without reference to the text.

Figures should be numbered consecutively in the order of their appearance and each should have a descriptive legend. Indicate magnifications. Line drawings should be made with India ink on smooth white paper or the equivalent. Do not submit original drawings larger in size than 8½ x 11; enclose smaller, unmounted prints for printer and for editorial use. Photographs should be unmounted, actual size, labeled and ready for half-tone reproduction. Use glossy prints with strong contrast; photo-offset printing reduces contrast. When several figures make up a plate, mount them on the back of a piece of photographic paper or indicate in some other way how they should be mounted. Use cardboard only to protect the package in mailing. The engraver will tool thin white lines between mounted figures later. Maximum size for figures is 5-½″ x 8″ for double column and 2-⅝″ x 8″ for single column. Where large micrographs are especially helpful, the full page may be utilized (6-⅞″ x 10″). To allow for trimming by the printer, add ⅛″ to width and ¼″ to length of the original print, and place lettering, including figure numbers, no closer than ¾″ to the margin. Figure numbers and lettering should be uniform size, 4–7 mm high. Indicate on the galley proof where the figures are to be placed. Mark all figures with the author's name and address. The author will defray the expense for colored plates. Two pages of half-tone figures per article will be published without cost to the author; a charge of $50 per page will be required for pages in excess of this number. Fifty gratis reprints are supplied. Additional reprints may be ordered when galley proof is returned.

References to the literature may be cited in one of the following forms: Doe (1955) has observed that . . . ; (Doe, 1955; Doe *et al.*, 1960); (Doe, 1961, p. 250). Use suffixes a, b, etc. following the date to distinguish two or more works by the same author(s) in the same year, e.g., Doe 1960a, b. Arrange literature citations in the bibliography alphabetically according to the surname of the author, using the following order of items: author(s), date of publication, title of article or book, journal name, volume number, inclusive pages, publisher and city (for books only). Abbreviate titles of journals in accord with Chemical Abstracts' *Service Source Index* (1969 Edition).

Classify your manuscript for editor's indexing when you submit it by answering the following questions:

(1) This manuscript is best described under the category, Developmental Biochemistry____, or Developmental Cytology____, or Developmental Genetics____, or Developmental Physiology____, or Experimental Morphogenesis____.

(2) Two additional key words or phrases for editor's indexing are:

_____; _____

(3) I $\begin{matrix}\text{do}\\\text{do not}\end{matrix}$ believe the paper should be included in the Journal's list of possible graduate and undergraduate laboratory experiments.

Announcements should be sent to the Editor-in-Chief to arrive by the 15th of the month preceding the issue in which the material is to appear. *News, opinion and letters* should be sent to Dr. Eugene Bell, Department of Biology, Massachusetts Institute of Technology, Cambridge, Massachusetts 02138, U.S.A. The correspondence section is not to be used as a medium for rapid publication of data. It is a forum for active exchange of ideas and opinions about research in developmental biology. Half-tone figures are not accepted, but in suitable cases line drawings will be. Material related to *Current Literature* should be sent to Dr. Francis J. Manasek, Department of Anatomy, Harvard Medical School, Boston, Massachusetts 02115, U.S.A.

ATTENTION AUTHORS

Photographs submitted for publication **must** be actual size for reproduction. Manuscripts received in the future which do not follow this rule will be returned unreviewed to the authors. The page size of the journal should be considered and the following format observed. (1) Column width figures are to be no wider than 2⅝ in. or longer than 8 in. (2) Page size figures should be 5½ in. wide and no longer than 8 in. (3) If the author decides to bleed the page (no margins), the figure must be 6⅞ × 10 in. (submitted as 7 × 10¼ in. to allow trimming); if the figure to be bled is under this size in either width or length it will not be accepted.

It is not necessary to submit the original for a line drawing if it is too large; a good copy reproduces well.
